PROFESSIONAL PROFILE

Multidisciplinary professional combining graphic design, full-stack software development and a strong technical/scientific background. Experienced in translating complex requirements into clear visual systems, digital products and reliable technical workflows. Currently focused on remote opportunities with agencies, studios and development teams where design thinking, development skills and technical problem solving create practical value.

CORE SKILLS

Frontend	React · Next.js · TypeScript · JavaScript · Tailwind CSS · HTML · CSS
Backend	Node.js · Express · NestJS · REST APIs · MongoDB · PostgreSQL · Mongoose · JWT
Design	Graphic Design · Brand Identity · UI Design · Editorial Design · Visual Communication
Tools & Tech	Git · GitHub · Docker · WSL/Linux · AI Integration · Automation · Python

SELECTED SOFTWARE PROJECTS

Restaurant Reservation Platform

Full Stack · 2026 | React · TypeScript · NestJS · REST API

- Designed a multi-branch reservation and restaurant-management platform with customer and restaurant-facing experiences.
- Structured shared types and validation, role-based flows, reservation lifecycle management and operational auditing.

Healthcare Management App

Web Application · 2025 | React · Tailwind CSS · React Hook Form · Zod

- Built role-based workflows for patients, professionals and administrators.
- Implemented protected routes, form validation, appointment-management flows and reusable interface patterns.

Bookstore API

Backend · 2025 | Node.js · Express · MongoDB · Mongoose · JWT

- Developed a REST backend with authentication, user management, validation and transactional email workflows.
- Worked with password hashing, token-based authentication, email verification and request lifecycle debugging.

PROFESSIONAL EXPERIENCE

Technical Professional Principal · Electron Microscopy / Scientific Services

CIME · CONICET NOA Sur · Universidad Nacional de Tucumán | Current

- Responsible for Transmission Electron Microscopy (TEM) and ultramicrotomy workflows, including sample processing, sectioning, grid preparation, contrast and image acquisition.
- Responsible for the renal biopsy service within the TEM area, supporting clinical and research work through standardized protocols, quality control and interdisciplinary coordination.
- Operate and support advanced scientific instrumentation and contribute to troubleshooting, maintenance and workflow continuity.
- Collaborate with researchers and medical teams on biological and materials samples, translating complex technical requirements into reproducible procedures and clear results.

Graphic Design & Visual Communication

Independent / Institutional Projects | 2010–Present

- Develop visual identities, editorial pieces, cultural communication and scientific communication for institutional and independent projects.
- Create design systems that organize complex information through typography, hierarchy, composition and consistent visual language.
- Combine design practice with digital production and web development to deliver communication assets across print and screen.

EDUCATION

Bachelor's Degree in Graphic Design

Universidad del Norte Santo Tomás de Aquino (UNSTA) · Tucumán, Argentina

SELECTED TRAINING

Full-Stack Development

Rolling Code School

Programming Logic · Web Page Design · Web Development with React · Full-Stack career track

Applied Artificial Intelligence

Universidad Nacional de Tucumán (UNT)

Applied AI and practical use of intelligent tools

Python

Santander Open Academy

Programming foundations with Python

Introduction to Machine Learning: Art of the Possible

AWS Skill Builder

Machine-learning concepts and applied possibilities

Generative AI & ChatGPT

LinkedIn Learning / Coursiv

Generative AI, intelligent search and practical AI workflows

Cryo-EM

Latin American Cryo-EM School · 2026

Cryo-EM workflows and practical training with cryoSPARC; complementary work with cisTEM and PHENIX

TECHNICAL & SCIENTIFIC BACKGROUND

Scientific work has strengthened a transferable skill set highly relevant to software and product teams: precision, documentation, troubleshooting, process control, reproducibility, complex equipment operation, interdisciplinary collaboration and continuous learning. This background complements a visual design perspective and current software-development practice.

LANGUAGES & WORK ELIGIBILITY

Languages Spanish: Native · English: Basic · French: Basic

Nationality Argentine and Spanish citizenship

Work mode Available for remote opportunities and collaboration with international teams

POSITIONING

Designer by training. Developer by evolution. Technical by nature.

Open to software-development, frontend/full-stack, digital-product and hybrid design-development roles where multidisciplinary experience is an advantage.
